INDIAN BOILER REGULATIONS, 1950

FOREWORD

The Indian Boiler Regulations, 1924 have been revised so as to bring them in line with the latest industrial developments and requirements. In carrying out the revision, the Central Boilers Board have been guided by the criticisms received on the draft regulations both from India and abroad.

The Draft Indian Boiler Regulations (Chapters I to X) and the Draft Regulations relating to the Economisers and Feed-pipes (Chapter XI) were published in the Gazettes of India Extraordinary dated October 3rd, 1946 and June 16th, 1947 under Central Boilers Board Notifications No. EL-II/304(1), dated the 27th September 1946 and No. EL-II/304(2), dated the 9th May 1947 respectively, for general criticism. The Board have examined the criticisms received and have suitably modified the regulations where necessary.

The more important change in the revised Indian Boiler Regulations is the introduction of a new Chapter relating to Economisers and Feed-pipes. The regulations provide for the independent registration of Economisers and their satisfactory inspection and safe operation. The other changes consist of the addition of a new Chapter relating to Fusion Welded and Seamless Forged Drums for Water Tube Boilers and Superheaters.

Extracts from the British Standards Specifications and American Society of Mechanical Engineers Boiler Construction Code have been incorporated with the courtesy of the British Standards Institution, London and American Society of Mechanical Engineers, New York.
